KASHIF BILAL ALI

Bengaluru, Karnataka, India | 9611860786 | kashif.bilal.ali07@gmail.com | linkedin.com/in/kba07

PROFESSIONAL SUMMARY

Tech Lead / Senior Software Engineer with **~8 years of experience** building and scaling engineering products across startups, enterprise platforms, and FAANG environments. Strong record of **0 to 1 product development**, architecture design, and shipping production systems using **Go, Python, distributed systems, microservices, AWS, GCP, PostgreSQL, Redis, and Kubernetes**. Also brings founder-style ownership through **part-time solo venture work, AI product building, software consulting, and early research-led product discovery**. Brings early exposure to **embedded systems, UART/CAN/I2C protocols, sensor-adjacent environments, Flutter, and React-based frontend work**, making the profile well aligned for a high-ownership full-stack role.

CORE SKILLS

- Languages: **Go, Python, JavaScript, Java, C**
- Backend: **Microservices, REST APIs, distributed systems, Flask, GORM, SQLAlchemy, RPC, Protobuf**
- Frontend / Mobile: **React exposure, Flutter exposure, web UI implementation, iOS app exposure**
- Cloud / DevOps: **AWS Lambda, Kubernetes, Docker, CI/CD, scalability engineering, performance optimization**
- Data / Storage: **PostgreSQL, Redis**
- Domain Exposure: **IoT / embedded systems fundamentals, sensor-adjacent systems, AI products, networking/security products, blockchain infrastructure**
- Leadership: **Tech leadership, sprint planning, stakeholder alignment, interviewing, hiring support, mentoring, cross-team collaboration**

PROFESSIONAL EXPERIENCE

Technical Lead | Ginco Inc (Remote)

Jan 2026 - Present | Tokyo, Japan

- Leading a **compact engineering team** and driving daily standups, task prioritization, and 1:1 execution rhythms.
- Supporting **JD creation, interviewing, and hiring** while partnering on team-building in a fast-moving environment.
- Operating in a **high-ownership leadership role** with scope across delivery planning, execution, and engineering coordination.

Senior Backend Engineer | Ginco Inc (Remote)

Feb 2024 - Dec 2025 | Tokyo, Japan

- Led the **design and implementation for 2 chains and 4 tokens**, contributing to end-to-end product and platform delivery.
- Drove automation across **6 blockchains** to improve stability and target **zero regression**.
- Reduced application turnaround time by **50% across 7 services** through engineering efficiency improvements.
- Worked on backend services for the **full lifecycle of cryptocurrency transactions in Golang**.
- Built brief frontend and mobile exposure through **frontend and iOS application work**, supporting a more full-stack profile relevant to product delivery.

Founder / Solo Preneur (Part-time) | Alhazen Labs

Mar 2023 - Present | Bengaluru, India

- Studying the effects of **climate change and rapid urbanisation** on health and lifestyle issues such as **brain fog, insomnia, hair fall, anxiety, and migraine**.
- Identified **4 product opportunities** with potential to address these problem areas through research-led exploration.
- Provided **software consultancy to Cafu (Dubai)** on technology and product-related initiatives.
- Built **AI products** as part of independent venture-led experimentation and execution.

SDE II - Amazon Go, Just Walk Out Tech | Amazon Web Services (AWS)

Mar 2022 - Mar 2023 | Bengaluru, India

- Built an AI **video generation platform using Python and AWS Lambda** similar to **Seedance**, **Sora**.
- Worked on a JavaScript-based experiment that helped save **millions of seconds** for CXQO associates handling low-confidence shopping events.

- Designed an **experimentation framework in Java** to enable safe testing without impacting receipt accuracy.
- Secured initial buy-in from **5 different teams across time zones** for a cross-functional initiative.

Software Engineer 2 | Sophos

Mar 2021 - Feb 2022 | Bengaluru, India

- Led implementation of a **networking object service using Go, GORM, PostgreSQL, and Redis**.
- Contributed to **Yang modeling-based configuration management and Go code generation**.
- Helped redesign **Sophos XG firewall for cloud-native deployment** using RPCs and Protobuf.

Software Designer I / II | Aruba, a Hewlett Packard Enterprise company

Jul 2018 - Feb 2021 | Bengaluru, India

- Worked on cloud platform modules including **registration, login, device onboarding, and license management** in a microservice architecture.
- Built APIs with **Flask, PostgreSQL, Redis, and SQLAlchemy** for systems handling large request volumes.
- Contributed to **RAPIDS, a real-time threat detection system** for identifying rogue access point and network attack patterns.
- Bootstrapped license information for **100k devices** to enforce checks during access point message processing.
- Delivered major optimization work including **50% Docker image size reduction and 92% build-time reduction**.
- Improved resilience and production stability through **hotfixes, retry logic, and defect resolution**.

Embedded Systems Intern | SION Semiconductors Private Limited

Jun 2017 - Jul 2017 | Bengaluru, India

- Worked with **STM32F407VG** and implemented the **UART protocol**.
- Built understanding of **ARM Cortex M4 components and processor architecture**.
- Gained exposure to **UART, CAN, and I2C protocols**, which strengthens fit for sensor-based and IoT-oriented product environments.

EDUCATION

R. V. College of Engineering, Bangalore | Bachelor of Engineering, Electronics and Communications | Aug 2014 - Jun 2018
