Experience

S&P Global Market Intelligence | 2022 – Present
Cappitech Regulatory Reporting

- Assisted clients in timely and accurate trade reporting across multiple global regulatory regimes including MiFID II, EMIR Refit (EU & UK), ASIC, MAS, HKTR, Canada, and CFTC, ensuring compliance and preventing reporting breaches.
- Collaborated with ARM, DTCC, FCA, and NCAs to investigate and resolve trade rejections, NACKs, and exceptions, using root cause analysis and providing clear feedback to clients to maintain reporting integrity.
- Managed monthly reconciliation for MiFID II – MDP between Cappitech and FCA, identifying and investigating breaks, and proactively informing clients of discrepancies to ensure alignment with regulatory records.
- Leveraged SQL to perform data extraction, investigate reporting issues, and implement minor script updates for automated data channels, enhancing processing efficiency and accuracy.
- Identified system bugs and raised Jira tickets, while engaging in onboarding and UAT testing to support new client integrations, migrations, and production deployments, ensuring a smooth go-live experience.
- Supported clients in aligning with regulatory frameworks including CFTC, ESMA, HKMA, and JFSA, offering strategic guidance during implementation and ongoing reporting cycles.
- Played a key role in projects involving LEI mergers, counterparty migrations, ESMA Refit, DTCC orphan trade clean-ups, and Pairing & Matching investigations, driving regulatory reporting accuracy.
- Managed the S&P Global (IHSM) Cappitech Regulatory Reporting Solution for EMEA & US, maintaining high-quality deliverables and ensuring continuous compliance with evolving regulatory requirements.
- Collaborated with Product and Technical teams to prioritize fixes, suggest system enhancements, and drive platform improvements based on client feedback and issue analysis.
- Performed daily data analysis using SQL, AWS, and Excel, working with large datasets to uncover insights, resolve data anomalies, and contribute to continuous process optimization.

Client Projects

Bank of New York Mellon (Fund Onboarding)

- Served as a custodian between counterparties, collecting and validating essential legal documents such as account control agreement, LSA, collateral agreements to ensure compliance with the Uncleared Margin Rule (UMR) and regulatory KYC

requirements for account openings.

- Conducted end-to-end regulatory checks to verify entity adherence to MiFID regulations, reviewing Articles of Association, Certificates of Incorporation, Regulatory Disclosures, and Trade & Transaction Reporting.
- Explored and implemented tailored onboarding methods for clients based on counterparty valuation, including Third-Party and Tri-Party Custodian models.
- Collaborated with the ISDA Credit Support Annex (CSA) team to define and document the terms and conditions of derivative contracts, mitigating counterparty risks and ensuring dispute-free agreements.
- Managed client contract lifecycles, including onboarding, maintenance, and offboarding.
- Contributed to process improvement initiatives by suggesting improvements in KYC documentation practices and workflows.
- Liaise with custodians, prime brokers, clearers and OTC counterparties to onboard equity, FI and OTC trading accounts for new and existing funds.
- Created weekly reports to meet client custodian and fund admin reporting requirements.
- Perform tasks on system like JIRA, NEXAN and SharePoint, etc.
- Maintained pipeline tracker with full accuracy.
- Liaise with partner teams like TMG, Legal, Regulatory Support, etc in resolving queries or obtaining appropriate documents.

Macquarie Group (EMIR Re-write)

- Collected and validated data from counterparties, including reporting obligations, EMIR Entity Types, and LEIs, ensuring compliance with EMIR requirements. Also, prepared and submitted accurate trade data to trade repositories, meeting EMIR reporting standards.
- Worked with legal and compliance teams to address reporting gaps and implement solutions.
- Collected all the essential information from the client's counterparties such as Unique Product Identifier (UPI), LEI, Collateral & Valuation data, Legal Entity Name, etc.
- Developed and maintained EMIR reporting processes, ensuring accurate and timely reporting of OTC derivative transactions to the European Securities and Markets Authority (ESMA) and Financial Conduct Authority (FCA).
- Conducted thorough data analysis to identify and resolve discrepancies in EMIR reporting data, ensuring data accuracy and completeness.
- Collaborated with legal and compliance teams to ensure adherence to EMIR regulations and best practices.
- Identified and implemented process improvements to enhance the efficiency and effectiveness of EMIR reporting, resulting in reduced reporting time and improved data quality.

American Express Bank (Regulatory Reporting)

- Managed a large-scale outreach project involving the collection and validation of critical company information, including Taxpayer Identification Numbers and Doing Business As (DBA) details, from over 200,000 card members to meet regulatory compliance requirements.
- Developed targeted strategies to prioritize high-value clients, enhancing data collection efficiency and regulatory compliance, leading to a 30% increase in response rates.
- Built and maintained a dynamic dashboard to provide stakeholders with weekly progress updates, enhancing project transparency and decision-making.
- Streamlined project workflows through strategic planning and proactive problem-solving, ensuring timely delivery of objectives while maintaining data integrity.
- Worked closely with legal, operations, and risk management teams to ensure seamless KYC and AML compliance across the organization.
- Performed comprehensive risk assessments of new clients and ongoing transactions to identify potential red flags.
