SUMMARY

FP&A professional with 4+ years in banking and financial services, specialising in end-to-end financial planning, forecasting, and management reporting to support senior leadership decision-making. Experienced in partnering with business, Finance, and cross-functional teams to deliver P&L analysis, variance deep-dives, and strategic insights across revenues, expenses, and key performance metrics. Proficient in Power BI, Advanced Excel, Oracle ERP, and automation tools to drive reporting efficiency and data quality.

PROFESSIONAL EXPERIENCE

Senior Manager – FP&A **Oct 2025 – Apr 2026**
Aditya Birla Capital

- Support end-to-end financial planning and forecasting process covering revenues, expenses, and key performance metrics, ensuring accuracy, timeliness, and alignment with firm standards.
- Prepare and enhance monthly and quarterly management reporting including P&L statements and key business drivers, highlighting trends, risks, and opportunities for leadership; track actuals vs. forecast and make necessary adjustments.
- Perform deep-dive analyses on business performance across cost centres and departments to explain variances versus plan and prior periods, identify root causes, and support strategic management requests.
- Gather, analyse, and summarise recommendations for financial plans, trended future requirements, and operating forecasts; partner with Finance & Business Management to align assumptions and validate key drivers.
- Automate and enhance recurring MIS dashboards and financial models using Power BI and Python, improving data quality, reporting efficiency, and productivity across planning activities.
- Ensure governance, control, and documentation standards across planning and reporting processes in Oracle ERP, including vendor invoice validation and monthly bank reconciliations.

Manager – Business Finance / FP&A **Aug 2021 – Aug 2025**
Axis Bank

- Partnered with department and business unit managers to align timelines, methodologies, and assumptions for annual and rolling budget cycles, ensuring accuracy and consistency across the organisation.
- Prepared monthly and quarterly P&L reports and management presentations summarising financial performance, variance analysis, and business drivers for senior leadership review.
- Performed financial and economic analysis including cost-benefit assessments, working capital monitoring, and investment performance tracking to support resource allocation and cost discipline decisions.
- Developed Power BI dashboards and KPI models improving reporting efficiency by 30%; built Power Automate & SharePoint workflows automating reporting across 3,200+ employees.
- Collaborated effectively across cross-functional teams — business finance, product owners, and support functions — fostering transparency and ensuring on-time delivery of recurring and ad-hoc planning initiatives.
